We are an international awarded design studio based in Valencia, Spanish's Mediterranean coast. Focused on product, branding and interior design, currently collaborating with companies all around the globe.

.....

bio.

Honest, simple, durable: my style, my work.

Since the beginning of his career, the designer Jorge Herrera always aimed to create objects and spaces that are simple and essential, top qualitative and long term lasting in terms of use, production and design.

After years of global and multidisciplinary training, Jorge Herrera decided to further deepen in all areas for both the creative and technical process in design. In the 2008 he opened his studio with a strong sense for simple processes, detail and passion.

Since then, the studio worked engaging in numerous projects in close collaboration with many international companies and major brands, such Flos, Porcelanosa, Miyazaki Chair Factory, Forma 5, L'ac, Cridea, Nadis, It also has been involved as art director and curator for many exhibitions and fairs installations around the world.

Today Jorge Herrera's approach to design is characterized by a clear pursuit of a balance between simplicity, functionality and beauty: the pillar of his style and the focus of his work.

Jorge Herrera is also guest lecturer at the European Institute of Design (I.E.D) of Madrid and at the Cardenal Herrera University of Valencia (CEU) where he conducts workshops on a regular basis. He won many international awards like Red Dot award, Good Design award and Idea award.

vision.

Design is a tool to the simplicity.

At Jorge Herrera Studio we are passionate for details. Our work is a constant quest for precise and simple solutions because we consider design as a tool to make the complex easy. We believe in differentiation and we want to explore new paths that lead us to smart and practical solutions.

We believe in innovative techniques and processes, with the firm commitment to continue improving and learning. We are guided by tradition, and at the same time we love all modern things: pleasant proportions, aesthetics, elegance and products that evoke nice sensations. Someone once said that simplicity is the ultimate sophistication. We have made this quote as our main pillar of our work.
